TECH SHIRT

Cigna Healthcare's Wellness in Motion tour is a mobile health tour that is set out to serve the broader community and save lives by bringing critical health services and education to people. Stop by the Wellness in Motion van located outside the expo exit to participate in biometric (blood pressure, cholesterol, blood sugar, and Body Mass index) as well as skin cancer screenings.

A health coach will review your results for you. The entire experience takes under 15 minutes and you don't need to be a Cigna Healthcare customer!
